

We take your ideas and turn them into map signs that are easy to understand and follow.

HOW IT WORKS:

What you give us:

- Your ideas
- Any existing maps you have
- A map marking the property boundary

What you get:

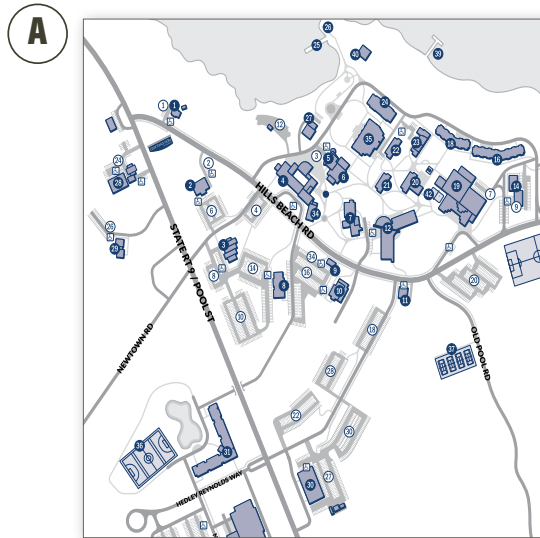

- A completely reconstructed map
- All elements redrawn and squared for accuracy and precision
- Illustrator files with layers, adaptable for web and print
- Easy-to-read labelling so people can find their way

1 STYLE

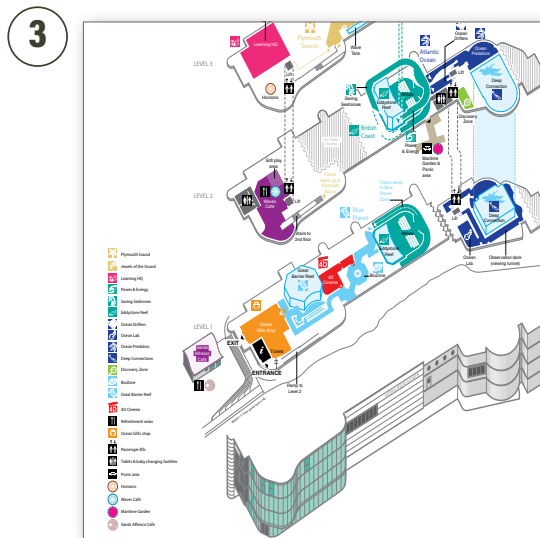

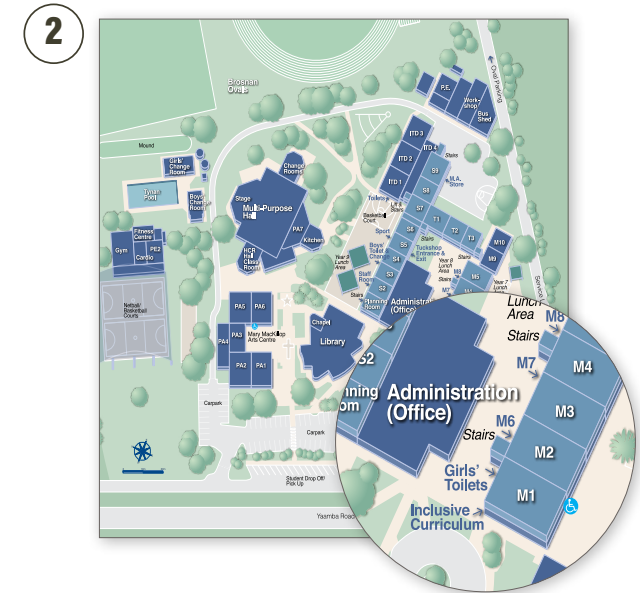

Welcome visitors with a map that complements your brand.

Which look do you prefer?

2 PERSPECTIVE

- 1 Basic straight down 'satellite' view
- 2 Multi-story straight down 'satellite' view
- 3 Exploded view with detailed floor plans of multi-story buildings
- 4 3D 'bird's eye' oblique Available only in style D or E, (see page 1).

3 ORIENTATION

1 North at the top works best for print applications

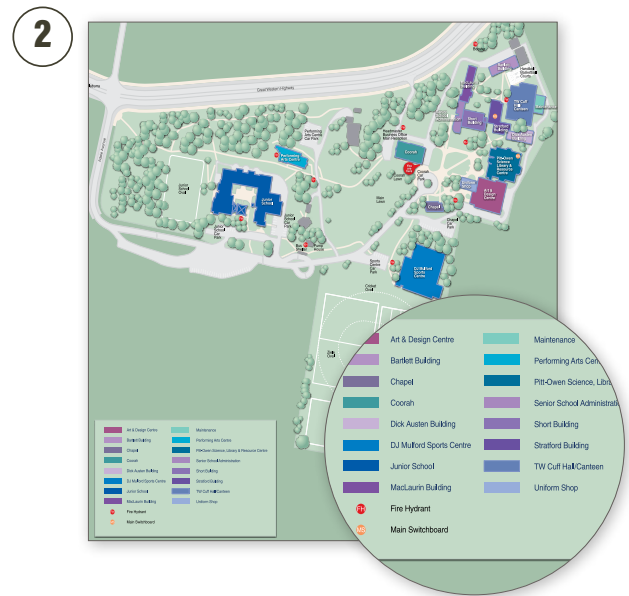

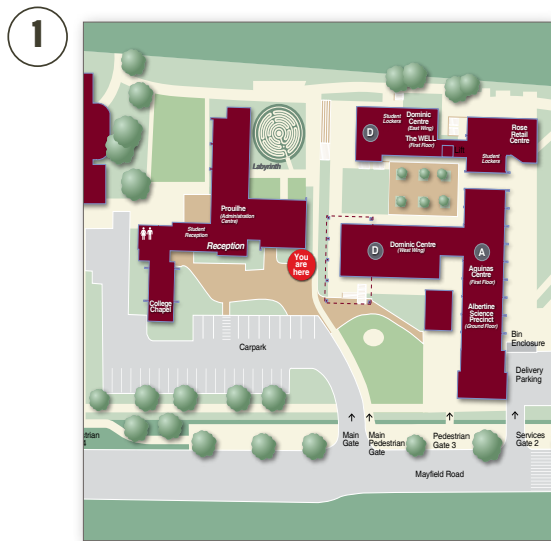

2 Heads up is orientated according to the direction the viewer is facing at the installed map.

This is easier to navigate, but can be more expensive if the project requires multiple orientations.

4 LEVEL OF DETAIL

- 1 Basic labelling of buildings and landmarks; no legend required
- 2 Colour Coding and a legend with basic labelling of buildings and landmarks
- 3 Coordinates and a legend with basic labelling of buildings and landmarks for more complex campuses. (Price depends on the complexity of the campus and the number of buildings.)

5 I'M READY! WHAT'S THE NEXT STEP?

Let our experienced and helpful representatives guide you through the entire process.
